

## APPROACH

**WE CREATE  
SPACES AND  
ENVIRONMENTS  
FOR PEOPLE TO  
ENJOY LIFE.**

## COMPANY GOALS

1. To purify stormwater sewage and runoff  
##through ecological processes
2. To design a landscape that allows for  
##human experience and connection to place
3. To provide comfortable public gathering  
##space for the community
4. To create a safe public landscape
5. To promote the expression of local  
##culture
6. To educate the community on regional  
##issues

“  
**CONNECTING  
PEOPLE AND  
PLACES.**

- DWLA

”

## MISSION STATEMENT

To strengthen the connection between people and place. Through ecological and cultural design, landscapes can be altered and revealed to create a functional landscape that emphasizes sense of place.

## WHAT WE DO

Dan Wilson Landscape Architecture focuses on designing both ecological and social landscapes that serve both nature and the community. Through in-depth site and cultural analysis, beautiful spaces that serve the community are produced.

### Ecological Landscapes

Through ecological design, restored landscapes have the ability to contain urban runoff and purify its pollutants. Wetlands function as natural water-treatment facilities, winding landforms mitigate urban flooding, and wildlife habitats are recovered. The designed landscape is able to alleviate human-caused disturbances. It not only works to mitigate pollutants and flooding, but creates a more beautiful landscape that allows human connection to place.

### Cultural/Social Landscapes

Landscape Architecture not only focuses on ecological function and natural elements, but social and cultural elements like urban spaces, streets, and community corridors. DWLA focuses on creating spaces that strengthen human connection not only to the landscape, but to other humans.
